

# Tendon (Tend) Token

Ver 1.0 September 2021

## Static Rewards, LP Acquisition, Manual Burn

Tendon (TEND) is a decentralized friction less yield-generation utility token. The token operates on an automated liquidity-locking and self-staking direct distribution protocol, providing safe, secure and hassle-free transactions and yield-generation for all holders.

**Tendon (TEND) is s BEP-20 token on the Binance Smart Chain Blockchain**

- **Contract; 0x222f737285D0B60d8D4f27fA22cE8884c9F119F8**
- **Website; [www.tendontoken.com](http://www.tendontoken.com)**
- **LP LOCK: <https://mudra.website/?certificate=yes&type=0&lp=0x8057832b16c8488ee8b494d2cd37d017e330225a>**

It is important to understand that investing in Cryptocurrency is highly risky., Tendon \$TEND does not offer financial advice. Do your own reasearch "DYOR" to ensure this token is suitable for you.

**Tendon (TEND) long term goal is to establish itself as an industry leader in the emerging Decentralized Finance sector, focusing wholly on our community of holders and developing the functions and features the community expect, while providing economic growth for all HOLDERS through auto liquidity and static redistribution of Tendon (TEND).**

## Static Redistribution

Redistribution is conditional upon the volume of the token being traded. This alleviates sell pressure caused by early investors buying at the token's start, when the Liquidity Pool is extremely low. The reward is that the early investor's potential high sell volume would increase the a mount of coins redistributed to the Liquidity Pool and community members' wallets.

## Automatic Liquidity Pool

Like many recent community-driven coins, liquidity is automatically added in the liquidity pool. The contract takes a 3% fee from the following, any sell/buy order, or transferring between wallets, then redistributes those tokens. A portion of that fee (1% of sell/buy or transfer transaction) is added to the liquidity pool. The penalty is a deterrent for trying to play

the extremes of the market; however, the redistribution rewards holders that hold while Tendon transactions occur between these extremes. The goal is to retain long-term holders and ensure confidence in investors to hold during volatility while earning redistributed returns. Tendon (TEND) vision is to make people money safely and securely while befitting our environment, and hopes to protect all investments by implementing algorithms to mitigate market manipulation tactics employed by large investors.

### **Safety**

Tendon (TEND) aims to be a safe, long-term investment that grows with its community. We opened with a fair launch with no presale. The initial Liquidity Pool has been locked for 2 years Link to Lock Certificate located on Website ([www.tedontoken.com](http://www.tedontoken.com)). The developer is committed to the project and to the community. A Marketing/ Promo wallet has been set up to ensure funds are available in the future for development, marketing, promotions and if needed to manual burn tokens or add to Liquidity. Link to wallet address on website ([www.tendontken.com](http://www.tendontken.com)) for transparency. This wallet will be used according to how the community dictates. Anti Whale protection can not buy or sell 20% of available pool. A whale dumping may cause short term harm to the value of Tendon (TEND), but the community can always recover. To ensure a long life of Tendon (TEND), liquidity is added to the Liquidity Pool with every transaction. As it is all burnt, no one (including the developer or admins) can pull the liquidity out. The more transactions, the higher the floor gets! 1% is sent to Promo Marketing wallet.

### **Tokenomics**

Tendon (TEND) launched with a maximum total supply of 1,000,000,000,000,000 TEND, with 10% of the supply sent to a burn wallet as a deflationary force on the token. Every sell or transfer transaction with Tendon incurs a 3% fee - 1% is locked in liquidity, 1% is directly distributed to all holders, and the remaining 1% is sent to the Marketing Wallet. We manually burn tokens. With burnt TEND growing over time, the amount of available supply and yield generated decreases as the burn rate increases, forcing Currency appreciation and asset-value protection.

Total Supply: 1,000,000,000,000,000

Initial Supply Burn: 98,272,021,116,812

Fair Launch Supply: 991,000,000,000,000,000

Tendon (TEND) employs 2 simple functions: Reflection + Liquidity Pool in each sell/buy or transfer trade. The sell/buy or transfer transaction is taxed a 3% fee, which is split

- 1% distributed to Tendon holders.
- 1% is redistributed to the Liquidity Pool.
- 1% Marketing - Promo Wallet

**Please note this fee applies on all buy,sell or transfer orders - Network fees apply**
